

MP3Gain, version 1.2.4

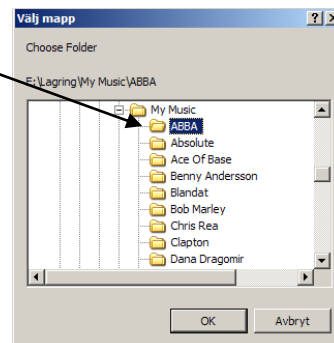

Make each mp3 folder have the same average volume

Step 1 Click the **Add Folder** button

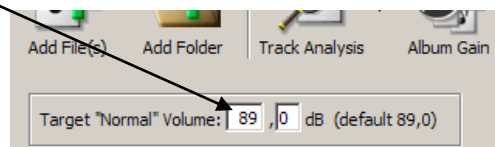

Step 2 Navigate to where the folder that you want to convert is and select it

Repeat as needed if you have more than one folder you want to normalize

Step 3 Set your **Target Volume** in Decibels (dB) in the **Target "Normal" Volume** field.

Step 4 Click the **Album Analysis** button

MP3Gain will analyze all of the files and report on each song's volume level, whether any clipping occurred, and other details including the combined album volume levels.

Step 5 Click the **Album Gain** button

This will adjust all the mp3s in the album so that the *overall* volume of each album is as close to the **Target "Normal" Volume** as possible. The volume differences between the mp3s on the album will stay the same.

Step 6 Listen to your new mp3s. If they sound too loud or quiet, adjust the **Target Volume** setting and click **Album Gain** again.
